AVIGNA means remover of obstacles. That is what we do for your business problems. We are all about problem solving as we analyze your requirements and turn them into efficient solutions by leveraging our distinct business and technical services. AVIGNA provides business and technology consulting for small, medium and large businesses. Our consulting projects span a range of services from project management, business requirement analysis, system analysis, proposal development, architecture and design, technology evaluation, to engineering and implementation strategy.

What We Do

We have successfully:

- Architected innovative infrastructure solutions utilizing multiservice technologies such as Cloud Computing, Virtualization, Unified Communications, Network Security, Local and Wide Area Networking.
- Delivered design and implementation of state-of-the-art enterprise network infrastructure.
- Established vendor and service partner relationships to craft cost effective and low risk information technology solutions for our customers.
- Formulated complex Request For Proposals (RFP) and managed proposal development efforts on both client and vendor sides.

Finding Solutions, Enabling Success

We provide business relevant network and cloud centric solutions such as EASIER CLOUD that include:

- *Network Solutions Architecture*
- *Information Systems Security Solutions*
- *Information Technology Risk Management*
- *Information Technology Project Management*
- *Technical Proposal Development (Client and Vendor side)*
- *IT Procurement Support Initiatives*
