

Providing Solutions, Enabling success

AVIGNA is your source for value-based solutions in Network-Cloud Infrastructure and Security technologies.

MISSION

To provide solutions and enable success for our customers, our partners, and our organization.

VISION

To catalyze success by providing business relevant solutions utilizing network and cloud security centric technology solutions.

STRATEGY

Work as a business partner with our customers and deliver value ADD (Assessment, Design, Delivery) services such as EASIER CLOUD.

What We Do

We provide business relevant network and cloud centric solutions such as EASIER CLOUD that include:

- *Network Solutions Architecture*
- *Information Systems Security Solutions*
- *Information Technology Risk Management*
- *Information Technology Project Management*
- *Technical Proposal Development*
- *IT Procurement Support Initiatives*

About Us

AVIGNA is a small minority owned SBA 8(a) certified firm providing network-cloud infrastructure and security solutions to government contractors and the federal government. We leverage our extensive consulting experience to help our customers achieve their mission relevant outcomes such as employee productivity, cost control, revenue and growth acceleration, workforce retention and more.

AVIGNA means remover of obstacles. We are all about providing solutions by analyzing customer requirements and turning them into cost effective solutions by leveraging our distinct business and technical expertise. Our consulting projects span a range of services from project management, business requirement analysis, system analysis, proposal development, architecture and design, technology strategy and evaluation, to engineering and implementation.

AVIGNA name behind any of our solutions is synonymous to dedication, determination, and diligence.

What We Have Done

We have successfully architected innovative infrastructure solutions utilizing multiservice technologies such as Cloud Computing, Virtualization, Unified Communications, Network Security, Local and Wide Area Networking.

Department of Homeland Security (DHS):

As a subcontractor, we have evaluated, designed and implemented network modernization technologies such as Software Defined Wide Area Network (SD-WAN) as part of the enterprise network transition from GSA Networkx to EIS contract and assisted with OMB Mandated Internet Protocol transition from IPV4 to IPV6.
